

22nd to 24th August, 2025
Venue: Hotel Swosti Premium
Bhubaneswar, Odisha

NAME : Kelly Tilleman

DESIGNATION: director ivf laboratory

INSTITUTE : Ghent University Hospital, Ghent, Belgium

My background is in the field of proteomics where I obtained a PhD in biomarker research in inflammatory arthritides at the University of Ghent in 2007. At that time, I combined my scientific enthusiasm with the responsibility of quality manager for an accredited DNA fingerprinting laboratory. I started at the department for reproductive medicine in November 2009 where I combined quality management work with project and laboratory process management and research in fertility preservation.

Currently, I am responsible for the operational and quality management of the IVF laboratory of the Ghent University Hospital IVF lab, where I have the privilege to work with a very dynamic and enthusiastic team.

I am the past-coordinator of the special interest group SQART at ESHRE, Belgian representative for EDQM at the Council of Europe and board member of international organization ICCBBA (ISBT-128).
